Cycle Construction has been a company that has invested and seen the benefits of technology in the construction industry for many years. We have seen the benefits of GPS technology for survey and machine control through increase in production, reduction of survey cost, less rework, and overall cost savings. We started simply with one machine but have since grown our technology fleet to outfit most of our machines with GPS Machine Control capabilities. These include dozers, excavators, and Marsh Buggies. We have invested with multiple vendors through the years, but now we partner with Sitech Louisiana exclusively.

As we have grown and invested more into our equipment and technology we decided that we should partner with one primary vendor for our technology needs. We made the decision to invest fully in Si-Tech Louisiana given their reputation and our personal experience with their World Class Service, and employees with decades of experience in the construction industry. We have been able to utilize Sitech as a consultant, and leverage their expertise in survey, Grade Control systems, and 3D modeling for all types of Civil Construction projects. Another benefit that cannot be understated is their local service and parts department. Sitech Louisiana has proven to us on many occasions that they stand behind their promise of 24 hour up time. Finally, Sitech Louisiana offers local training and certifications for our employees to fully adapt and understand the products we have invested in.

Cycle decided a few years ago to fully invest with Sitech Louisiana and Trimble products. While this decision was at the time a bit more expensive one given the previous equipment, we purchased. However, it has turned out to save us money in the long run. Sitech has been there to help us trade out our old equipment and has been an important partner in our success as a company. Their team of employees worked with us to grow with Trimble technology at our pace. It has proven to be a great partnership, and we look forward to continuing our relationship going forward. Our partnership with Sitech Louisiana although a larger initial investment, has saved us money and been hassle free in the long run.

Sincerely,

Lionel Beebe

Equipment Manager
